

2nd. Zoo Landscape Conference

2021.Nov.20th.Sat 10:00 — 17:35

By ZOOM, online

Organizer: Zoo Landscape Conference

Cohosts: Kyoto City Zoo, Tokyo Zoological Park Society

Partners: Japanese Association of Zoos and Aquariums, Japanese Institute of Landscape
Architecture, Consultants of Landscape Architecture in Japan, The Japanese Society for
Exhibition Studies, Society for the Study of Human Animal Relations

Program for 2nd.Zoo Landscape Conference

- 10:00 Opening remarks Kenji Wako
10:05 Juichi Yamagiwa (Research Institute for Humanity and Nature)
Message: Zoo is the Window to Nature
10:15 Jon Coe (Jon Coe Design) Naturalistic Design - Enrichment and Respect
10:45 Kenji Wako (Osaka University of Arts)
Method for Creating Meaningful Zoo Landscapes
11:15 Wataru Fukui (Kyoto Prefectural University) Effect of Plants and Zoo
11:45 Hajime Nakamura (Nakamura Hajime Office)
Landscape Design of Aquarium
12:15 Lunch time
13:10 Joann C.W.Chang (Taipei Zoo)
Exhibition Design by Reused Wood at Taipei Zoo
13:30 Monika Fiby (Zoo Design and Consulting)
Preventing Bird Collisions with Glass
13:50 Monika Lake (Auckland Zoo)
An Aerial Pathway habitat: Structure and Landscape
14:10 Hidetoshi Kurotori (JORC·BCTJ)
Orangutan Exhibit Facility from Ape House
14:30 Jun Furusawa (Chausuyama Zoo)
Habitat Exhibit for Orangutan Using Existing Forest
14:50 Shinsuke Yamaki (Sho-Sekkei Co.) Panda Exhibit at Ueno Zoo
15:10 Rest time
15:30 Hidehusa Sakamoto (Kyoto City Zoo)
"Forest of Kyoto" in the Kyoto City Zoo
15:50 Naoya Honda (Maruyama Zoo)
Landscape for Indoor Reptile-Amphibians Facility
16:10 Ikuri Kato (UDS Ltd.)
Considering the System of Landscape in Aquarium Exhibits
16:30 Nao Koyama (Atelier TMB)
Design and Function for Naturalistic Artificial Facility
16:50 Ayaka Okano (Tama Zoo)
Planting Good Attractive Methods for Animals
17:10 Hiroshi Yamashita (Landscape Architect)
Creating Impressive Zoo Facilities-awareness-
17:30 -17:35 Closing Remarks Hiroshi Yamashita

Zoo Landscape Conference Founding Vision

Zoos should be a place for their visitors to learn and to relax. At the same time, they must be a place for their animals to live comfortably. Therefore zoos should strive to provide a comfortable environment for both humans and animals. Plants play a major role in creating this kind of environment. In nature, many wild animals' lives are intertwined with plants and they cannot live without each other. The coexistence of plants and animals in a limited space at zoos was considered to be too challenging. But in recent years, techniques have been developed to overcome the difficulties and the inclusion of natural elements such as plants, soil, and water in zoo exhibits is becoming a mainstream practice around the world.

Recreating a species' habitat in a zoo not only allows the animals to lead comfortable lives, but also provides opportunities for visitors to see the animals' lively behaviors and learn about their natural environments. Trees also provide shade and comfort for both animals and visitors. As one of the precious greenery spaces in cities, zoos need to provide healthy growths of plants and trees. Plants are the underpinnings of beautiful exhibits that touch the visitors' hearts.

The Zoo Landscape Conference is a forum that aims to help create such environments in zoos. This Conference shall conduct research about incorporating plants, soil, and water into zoos, exchange information from Japan and abroad, and disseminate the results to the world, and thereby aspire to contribute to the realization of a society that coexists with nature. We look forward to the participation of those who are interested.

Participation Fee 4,000yen

* Include the Journal of "Zoo landscape Vol.1"
and Presentation Abstracts.

Registration Please apply from the QR code.

It will close as soon as the capacity is reached.
